

## DBT D-Shape Earpiece with Boom Mic and PTT

Page 1 of 1

The plug and some other features may vary from illustrated depending on your radio

### Standard Duty D Shaped Earpiece with Boom Microphone

#### Key Features

- **Mic Close to Mouth**
- **Head-Up Transmitting**
- **Soft Rubber D, Flexible Boom**
- **Loud Clear Audio**
- **Rotating Clothing Clip On PTT**
- **12 month warranty**

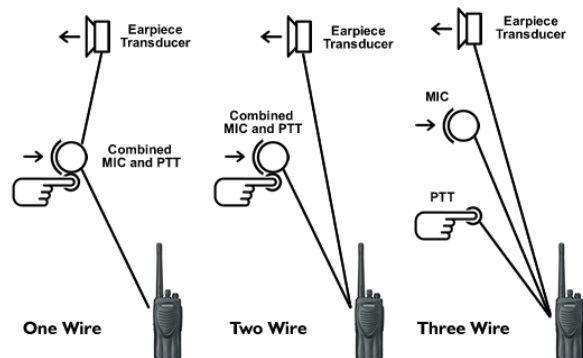

#### Ideal Applications

- **All Applications**
- **Usable Under Hats, Helmets etc.**
- **Event and Venue Communications**
- **Machinery Operators**
- **Noisy Environments**

An excellent earpiece for both noisy and quiet situations. Allows head-up communication. Boom Mic picks voice above background noise. Large PTT for gloved use. Also has a socket for optional extension PTT. It is ideal for light to medium duty uses, two or three working days per week. Supplied with a full 12 month warranty when used as recommended.

Audio is loud and very clear and because the earpiece sits outside the ear it will not block ambient noise. This

makes it ideal where situational awareness is important, working with people, stage use, moving vehicles, machinery etc.,

**One Wire System** The large PTT is clipped to the lapel or other clothing and can be used with gloved hands.

**Options** VOX, Remote PTT, Wind-shield.

**Specification** Cable diameter: 2mm above Mic, 2.5mm below Cable Length: Radio to Collar Clip 75cm. Earpiece to Mic-PTT 30cm

**Part Number DBT Available to fit** Virtually all current and many older popular radios. Please use our on-line Parts finder to get pricing for you radio model.
