

Headset MK-OBT2 Page 1 of 1

McKay Mid-weight Headset MK-OBT2
A mid weight dual ear cup headset with boom Mic.

Ideal for communications in noisy environments where full ear-defenders would be unnecessary; for non health and safety applications where noise levels are high but below 'action' thresholds.

To fit virtually any radio.
Using the McKay plug and play radio plug system (CLAW) this headset can be connected to virtually any make of radio and if you change your radio only the low cost radio plug (CLAW) needs to be replaced.

PTT Options.
Using the McKay CLAW system a choice of Press to talk buttons can be used. From a large rugged PTT for gloved hands through to a small finger PTT or even radio VOX there will be a PTT suit your application.

Typical Applications.

- **Motor sports**
- **Noisy Venues**
- **Control rooms**

Key Features

- **Noise cancelling boom Mic**
- **Twin Ear cup**
- **McKay Claw system**

McKay CLAW System
McKay headsets have a universal socket into which a short cable with a suitable radio plug is fitted. This enables you to move you headset between different makes of radio.

McKay CLAW PTT
Similar to the above CLAW system but with an integral PTT (Transmit button) to suit your application. Large, Small, Waterproof, Finger etc.

Price
